OBJECTIVE

Full-Stack Web Developer with a strong foundation in computer science, specializing in **Next.js**, **React**, **React Native**, **JavaScript**, **TypeScript**, and **Python** to build dynamic and responsive user interfaces. Skilled in **Node.js**, **Express**, and database management with **MongoDB**, **MySQL**, and **Oracle**, ensuring efficient data handling and performance optimization. Adept at developing scalable APIs and architecting high-performance back-end systems. Strong problem-solving abilities with a focus on delivering robust, end-to-end web solutions..

SKILLS

Languages	TypeScript, JavaScript, Python, C++, Bash, SQL
Technologies	Next.js, React.js, React Native, Node.js, Express.js, MySQL, MongoDB, Redis
Tools	GitHub, Git, Postman, Jupyter Notebook, Docker

EXPERIENCE

FrontEnd Web Development Internship

May 2024 - Aug 2024

WebDev Masters

Remote

- Integrated React components to enhance modularity and reusability, improving maintainability and scalability of the application.
- Implemented modern UI/UX principles using Bootstrap and CSS to enhance the visual appeal and functionality.
- Utilized JavaScript to create dynamic, interactive elements for better user engagement.
- Optimized website performance and responsiveness for various devices and screen sizes.
- Worked on cross-browser compatibility to ensure a seamless experience across different platforms.
- Gained hands-on experience in debugging and troubleshooting front-end issues.
- Collaborated with mentors and team members to improve code quality and development workflow.

PROJECTS

Bite Savor. Developed a fully functional food ordering website using **React**, **Node.js**, **Express**, and **MongoDB**, integrating **Stripe** for secure payment processing. The platform allows users to browse food items, place orders, and track their order status in real time. Implemented user authentication, ensuring secure access, and optimized API performance for efficient data handling. Additionally, designed an intuitive admin panel for managing food items, orders, and user data. Focused on delivering a seamless and responsive user experience across web and mobile devices.[\(Try it here\)](#)

WealthSync. Developed **WealthSync**, a full-stack expense tracking app using **React**, **Node.js**, **Express**, **Tailwind CSS**, and **MongoDB**. Enabled users to manage income/expenses, visualize data with **bar and pie charts**, and download reports in **PDF and Excel** formats. Ensured a responsive UI and implemented secure REST APIs for smooth, real-time financial tracking and data handling. [\(Try it here\)](#)

Weather App. Developed a **React Native** application that provides real-time weather updates and a **7-day forecast** using the Weather API. Features include current weather details, city-based search, and geolocation support, displaying temperature in Celsius. Designed a responsive and intuitive UI for a seamless mobile experience. Optimized API requests using Axios to ensure efficient data fetching and smooth performance.[\(Try it here\)](#)

EDUCATION

Bachelor of Computer Science, University of Engineering and Technology, Lahore

Expected Oct 2026
